FIREWALL AUDIT

Future Com's years of experience managing and configuring firewalls provides a second set of eyes to your security policies to help identify potential issues and improve your security posture. We take a systematic approach to reducing the number of rules in your policy without losing the integrity of your security.

FUTURE COM'S EXPERTS CAN ASSESS FIREWALL RULES AND PLATFORM CONFIGURATIONS TO RAPIDLY FIND ISSUES THAT LEAD TO SECURITY BREACHES OR COMPLIANCE INFRACTIONS.

Our rule base assessments will point out:

- Potential Rule Vulnerabilities and Ineffective Rules
- Shadowed and Redundant Rules
- Firewall Operating System Vulnerabilities
- Rule Placement Efficiency
- Best Practice Compliance

Future Com will mitigate risk and simplify compliance with onsite or offsite auditing solutions.

FIREWALL AUDIT

The audit can be performed onsite or offsite and can be done on a variety of vendor platforms including:

- Barracuda
- Check Point
- Cisco
- Fortinet
- Juniper
- Palo Alto
- Sonicwall
- Sophos
- Watchguard

We can also audit router and switch ACL's from various vendors. You will receive a professionally produced assessment report summarizing your security posture, classifying severity of issues, and detailing the findings. Each finding includes the description, the impact, the ease of remediation, and the recommendation for compliance.

ABOUT FUTURE COM

Future Com is redefining cybersecurity, consulting and cloud security. A privately held company for over 25 years, Future Com is an integrator of leading industry brands, delivering customized solutions to secure our customers' networks wherever they are.

Future Com provides consulting services and products with a focus on cloud and cybersecurity solutions. We partner with our customers, working with them on everything from preventing the loss of electronic data to ground-up network design and implementation.
