# NETWORK TRAFFIC ANALYSIS

## THE QUESTION

Are you experiencing application performance issues and can't determine the source of the problem? Are your high-speed Internet circuits continuing to be overloaded even after adding more bandwidth? Are you considering upgrading your Internet bandwidth to increase performance?

FUTURE COM USES MANUAL AND AUTOMATED TASKS TO REVIEW, RECORD AND ANALYZE NETWORK TRAFFIC FOR PERFORMANCE, SECURITY, AND GENERAL NETWORK ACTIVITY.

## THE ANSWER

Our Network Traffic Analysis is an on-site evaluation of network traffic using real-time visibility and monitoring. The analysis helps you to identify bottlenecks, inefficiencies, and recreational traffic on your network quickly and easily.

## THE VALUE

Future Com's Network Traffic Analysis helps you to gain the intelligence necessary to cost-effectively accelerate and control the delivery of business-critical applications. You can reclaim bandwidth from recreational traffic, solve performance issues, and avoid unnecessary and costly circuit upgrades.

# ABOUT FUTURE COM

Future Com is redefining cybersecurity, consulting and cloud security. A privately held company for over 25 years, Future Com is an integrator of leading industry brands, delivering customized solutions to secure our customers' networks wherever they are.

Future Com provides consulting services and products with a focus on cloud and cybersecurity solutions. We partner with our customers, working with them on everything from preventing the loss of electronic data to ground-up network design and implementation.
